

In library, digital search system has been installed which help students to search the most important books. This process make the students aware about the digital use and purpose and they took interest in smart class learning process. In laboratories, regular upgradation of equipments has been made. Chemical regents, solvents are regularly purchased for students practical classes and used poisonous chemicals are properly disposed off. it is mandatory for the students that they should use apron while performing experiments under the supervision of the concerned teacher. In the institution there are number of computers and they are properly maintained by ICT commiittee. The committee installs the antivirus time to time, changes UPS if necessary. In the classrooms, there are enough number of lights and fan for student comfort. The institution has switched over using green boards to reduce allergic consequences of blackboards and also enhance the visibility and quality of writing. The seating capacity is updated from time or time.
